Bank of Scotland

Panticosa Spa

At Arastone Alabaster, we offer several types of alabaster, specifically quarried for different commercial and artistic uses.

We currently offer two exclusive alabaster varieties:

ZAIDA It stands out for its exceptional snow-white translucency, with reddish earth-toned veining and subtle cloudy textures.

EBRO Recognized for its milky translucency and veining in earth and greyish tones.

We supply panels up to 120 × 60 cm, with a minimum thickness of 7 mm.

Exceptionally, larger pieces may be available depending on the characteristics of the quarried block and production constraints.
